About Container Domes Australia

Container Domes Australia is a family-owned company with a leading-edge fabrication facility located in Yandina, QLD Australia.

We have been at the forefront of designing and manufacturing premium quality shelters, each meticulously engineered to meet the specific needs and objectives of our clients.

With extensive experience across a wide range of projects, we provide end-to-end solutions designing, engineering, manufacturing, and installing shelters tailored to each client's needs.

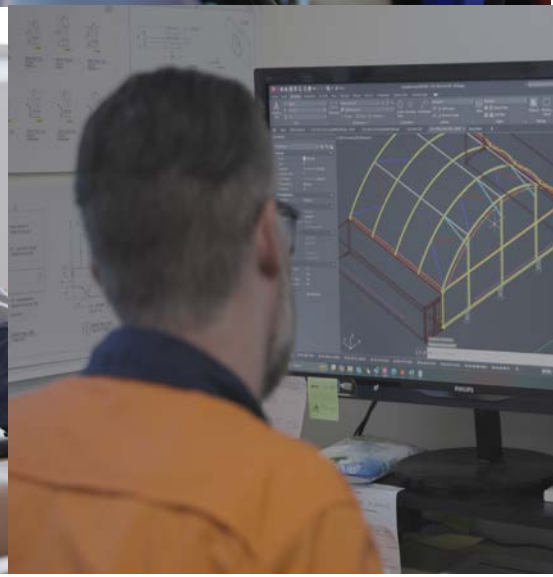
AUSSIE MADE FOR THE HARSHEST CONDITIONS

We are very proud to remain one of the few container dome companies still manufacturing locally in Australia. We've designed our products and services with one goal in mind: to provide Australian industries with the highest quality shelters that stand up to the harshest conditions.

Our shelters are:

- Engineered to meet Australian Standards: AS1170.2, AS5131, AS4100, AS1554.1
- Certified to Level of Importance 2, Terrain Category 2
- Wind rated for regions A, B, C or D

While these are the baseline standards that we work to, our shelters can be engineered well beyond these specifications to meet unique site requirements. Whatever your enviromental demands, we can tailor a solution to match - or exceed it.



Our Standard Domes

Our Standard Domes are designed to provide robust shelter solutions for a wide range of applications.

Our Standard Range offers widths of 6m, 8m, 9m, 10m, 12m, 15m, 18m and 21m. Each size is designed to fit standard 20ft and 40ft containers.

- Base Rail Mounting System included as a standard design feature.
- Heavy-duty P.E fabric cover for high UV resistance and long-term durability.
- Galvanised RHS Steel Framework.
- Twistlock Brackets can be added for a weld-free installation solution.
- Full range of additional features and customisations.
- Various configuration options.
